EDUCATION

University of British Columbia

Bachelor of Science in Computer Science (88.8%, GPA: 4.2 / 4.33)

Expected Graduation: April 2028

Vancouver, BC

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C++

Frameworks/Technologies: React, Node.js, Express, Supabase (PostgreSQL), HTML/CSS, REST APIs

Tools: Git, GitHub, JUnit, Vitest, Firebase, Figma, Linux Command Line

Concepts: Object-Oriented Programming, Data Structures, Algorithms, Unit Testing, Integration Testing

TECHNICAL EXPERIENCE

Software Developer Intern

Remote

KAIA Network (AI for Social Good Research Collaboration Platform)

Feb. 2026 – Present

- Shipped 4 production features (Knowledge Hub, donation page, user profiles, Network ranking) for a 350-user global platform, improving content discovery and profile completion rates using React, TypeScript, and Supabase
- Diagnosed and resolved 10+ production bugs across UI, backend, and database layers restoring search, notifications, and media workflows and reducing user-reported incidents
- Identified and remediated 5 critical security vulnerabilities, including privilege escalation, SSRF, and missing input validation, by implementing Zod schema validation, scoped RLS policies, and authenticated edge function controls, eliminating unauthorized admin access risk for 350 users
- Maintained code quality across a 3-engineer agile team by leading PR reviews, resolving merge conflicts, and enforcing Git branching conventions to support continuous delivery

TECHNICAL PROJECTS

Read. For Speed | *TypeScript, React, Node.js, Express, Supabase, Vitest*

Feb 2026 – Present

- Built a full-stack reading training platform with RSVP drills, comprehension tests, and WPM analytics, tracking speed, accuracy, and effective WPM across user sessions
- Designed and deployed 10 RESTful API endpoints using Node.js, Express, and Supabase to handle user profiles, test attempts, and performance analytics with role-based access control
- Achieved full API route coverage by writing unit and integration tests with Vitest, validating middleware, route handlers, and core business logic
- Designed interactive reading and results interfaces for training sessions and to visualize user performance metrics

Carades (1st Place, CMD-F Hackathon) | *TypeScript, React, Firebase*

Mar 2026

- Won 1st place among 40+ teams at CMD-F 2026 by building a real-time multiplayer charades-style coding game in TypeScript and React within a 24-hour hackathon
- Architected real-time room synchronization for concurrent multiplayer sessions using Firebase Realtime Database listeners, keeping players, timers, scoring, and shared editor state consistent across all clients
- Shipped a live collaborative code editor using Monaco Editor with role-based access, progressive hint reveals, and real-time leaderboard updates

Weekly Meal Planner (Academic) | *Java, Swing, JUnit*

Jul 2025 – Aug 2025

- Built a weekly calendar-style desktop app to plan meals, compute costs, and generate shopping lists
- Designed object-oriented java classes for meals, ingredients, and weekly plans with JSON-based persistence
- Wrote JUnit tests to validate application logic, including meal management and cost calculations
